Education

ABES Engineering College, Ghaziabad <i>B.Tech in Computer Science & Engineering (DS)</i>	2021 - Present <i>7.0/10 CGPA</i>
Vatsalya Public School , Mathura , Uttar Pradesh <i>12th</i>	2020 - 2021 <i>86%</i>
Vatsalya Public School , Mathura , Uttar Pradesh <i>10th</i>	2018 - 2019 <i>95%</i>

Experience

Research Intern at	Duration
Indraprastha Institute of Information Technology, Delhi (IIIT-Delhi)	May 2024 – July 2024
Project: Hybrid LiFi and WiFi Network Optimization Mentor: Prof. Vivek Kumar	
- Worked on a research project focused on optimizing hybrid LiFi-WiFi networks for improved data throughput and connectivity. - Simulated signal-to-noise ratio (SNR) distributions using Poisson and Uniform distributions for multiple access points (4 LiFi, 1 WiFi). - Developed machine learning models to predict optimal access point allocation and estimate throughput based on SNR and user distribution. - Contributed to real-time decision-making algorithms for user-AP assignment in indoor environments.	

Projects

Brightness Control With Hand Detection <i>Python, Machine learning , Open CV</i>
- Developed a Python-based brightness control system using hand gestures, leveraging OpenCV and MediaPipe for real-time hand tracking. - Implemented finger detection to calculate the distance between thumb and index finger, dynamically adjusting screen brightness using Screen Brightness Control (SBC) API. - Integrated machine learning models for efficient and accurate gesture recognition. - Optimized performance to achieve smooth, real-time brightness adjustments through webcam input. Enhanced user interaction by providing a hands-free method for controlling device brightness.
Sorting Visualizer <i>Javascript, HTML, CSS</i>
- Created a responsive website using the javascript. - Data mining techniques data pre processing.
Memory Game <i>Javascript, HTML, CSS</i>
- Developed an interactive web-based Memory Game using HTML, CSS, and JavaScript, where players must match pairs of hidden cards to test their memory and concentration skills. - Designed the game with a sleek layout, ensuring an intuitive user interface, implemented smooth animations to enhance the gaming experience, providing a fluid and engaging user interaction throughout the game.

Technical Skills

Languages: C++, C, HTML/CSS, JavaScript, SQL, Python, Kotlin
Technologies/Frameworks: GitHub, Machine learning, Data Science, Cloud Computing
Developer Tools: VS Code, Android Studio, Figma, Microsoft Azure

Algorithmic Competitions/Achievements

- AWS academy graduate: Introduction to Cloud Sem 1
- AWS academy graduate: Introduction to Cloud Sem 2.
- NPTEL online certification.
- SQL HackeRrank Certificate.
